FEDERAL COMMUNICATIONS COMMISSION  
OFFICE OF THE SECRETARY

Dear Ms. Dortch:

On behalf of Radio Bilingue, Inc., I am filing herewith the original and four copies of a Petition for Rule Making for reservation of Channel 252C3 in Dallas, Oregon for noncommercial educational use.

If there should be any questions concerning this matter, kindly contact the undersigned.

Sincerely,

  
William J. Byrnes

FEDERAL COMMUNICATIONS COMMISSION  
OFFICE OF THE SECRETARY

MB Docket No. 03-\_\_\_\_\_  
RM-\_\_\_\_\_

To: Chief Allocations Branch  
Policy and Rules Division  
Media Bureau

### **Petition for Rule Making**

Radio Bilingue, Inc., pursuant to Section 1.401 of the Commission's Rules, by its attorney, requests that the Commission initiate a rule making proceeding to amend Section 73.202 of its Rules by reserving for noncommercial educational use Channel 252C3 currently allotted to Dallas, Oregon.

Specifically, Radio Bilingue requests that the FM Table of Allocations be amended as follows:

| <u>Community</u> | <u>Present</u> | <u>Proposed</u> |
|------------------|----------------|-----------------|
| Dallas, Oregon   | 252C3          | *252C3          |

The action requested is thus simply addition of an asterisk in the FM Table of Allotments to reflect reservation of that allotment for a noncommercial educational broadcast station.

The Commission has established clear and specific criteria governing petitions to add such an asterisk. Section 73.202(a)(1) of the Commission's Rules provides that:

"Channels designated with an asterisk may be used only by noncommercial educational broadcast stations. The rules governing the use of those channels are contained in part 73, subpart C of this chapter. An entity that would be eligible to operate a noncommercial educational broadcast station can, in conjunction with an initial petition for rulemaking filed pursuant to part 1, subpart C of this chapter, request that a nonreserved FM channel (channels 221 through 300) be allotted as reserved only for noncommercial educational broadcasting by demonstrating the following:

- (i) No reserved channel can be used without causing prohibited interference to TV channel 6 stations or foreign broadcast stations; or
- (ii) The applicant is technically precluded from using the reserved band by existing stations or previously filed applications and the proposed station would provide a first or second noncommercial educational radio service to 2,000 or more people who constitute 10% of the population within the proposed allocation's 60 dBu (1 mV/m) service contour."

Radio Bilingue is eligible to operate a noncommercial educational broadcast. It is a non-stock Oregon corporation and its eligibility is well-established. It is the licensee of existing noncommercial educational FM stations:

KSJV in Fresno, California,

KTQX in Bakersfield, California,

KMPO in Modesto, California,

KUBO in Calexico, California and

KHDC in Chualar, California.

If the reservation requested in this petition is granted, Radio Bilingue will file an appropriate application for Channel 252C3 in Dallas, Oregon when the Commission opens a filing window and, if authorized, will proceed promptly with the construction and operation of the new station.

The attached Engineering Report by Gray Frierson Haertig demonstrates that the proposed reservation complies with both the preclusion requirement of Subsection ( i ) above and the first or second noncommercial service requirement of Subsection ( ii ) above. The preclusion study also complies with the more detailed explanation set forth in Paragraph 35 of the Second Report and Order in Reexamination of the Comparative Standard for Noncommercial Educational Applicants, MM Docket No. 95-31, FCC 03-44, released April 10, 2003.

Accordingly, Radio Bilingue respectfully requests that the Commission initiate the proposed rule making to reserve Channel 252C3 in Dallas, Oregon for noncommercial service.

Respectfully submitted,

Radio Bilingue, Inc.

Prepared for Radio Bilingue, Inc.

ENGINEERING REPORT IN SUPPORT OF A  
PETITION FOR RULEMAKING TO RESERVE  
CHANNEL 252C3 AT DALLAS, OREGON  
FOR NONCOMMERCIAL EDUCATIONAL USE

This report has been prepared on behalf of Radio Bilingue, Inc., to support its Petition for Rulemaking to reserve Channel 252C3 at Dallas, Oregon, for noncommercial educational use.

47CFR§73.202(a)(1)ii provides that two conditions be met in order to reserve an allocation in the non-reserved spectrum for noncommercial educational use.

The first is that the proponent must be technically precluded from using a channel previously reserved for noncommercial educational use because of other stations or previously filed applications.

The second is that the allocation would provide first or second noncommercial educational service to 2,000 people and 10% of the population within its 60 dB $\mu$  contour.

This engineering report will demonstrate that Channel 252C3 at Dallas, Oregon, meets these conditions and therefore should be reserved for noncommercial educational use.

**Preclusion Study**

The Second Report and Order in MM Docket No. 95-31, at paragraph 35, provides for a test that "the Commission will treat as establishing a rebuttable presumption of technical preclusion."

The proponent must establish that no class minimum, rules-compliant facility could be constructed on a channel reserved for noncommercial educational use at the reference coordinates of the community of license; and

That no maximum same-class, rules-compliant facility could be constructed on a channel

reserved for noncommercial educational use at any of four points which are located on a circle centered on the reference coordinates of the community of license and having a radius one kilometer less than the radius of the predicted 60 dBu contour of a maximum same-class station. These points shall be equally spaced and start at 0 degrees.

Class C3 maximum facilities operate with an effective radiated power of 25 kilowatts and a height above average terrain of 100 meters. Minimum Class C3 facilities operate at 6 kilowatts ERP and 101 meters HAAT.

Attached as Exhibit I are five preclusion studies each consisting of computerized allocation studies for each channel from 201 through 220. The first study is for minimum Class C3 facilities at the reference coordinates of Dallas. The other four studies are for maximum Class C3 facilities at four points located on a circle of 38 kilometer radius centered on Dallas.

These studies demonstrate that existing stations and permits and previously filed applications preclude the operation of any Class C3 facility in the reserved spectrum.
